PROJECTS

Templ (Domestic Cat Software)

Fitness app that helps people get relief from pain and mobility problems due to musculoskeletal issues. It assists users in improving their overall health and being. The app features a list of programs, sessions, exercises, wellbeing and nutrition. The user can select a program and follow the exercise by playing the video.

JINS (US) (Cody Web Development Inc.)

This application is used in a physical store (JINS Store). Think of a local eyewear shop where you are assisted by the staff and with the help of this app it helps finding the eyeglasses frame and other processes in the store in an instant. The app features searching for eyeglasses frame, creating an order, submitting the client's eyeglasses prescription, and searching for the client's orders.

名刺DE請求 (Cody Web Development Inc.)

A business card management app. The app features a list of contacts, importing contacts from iPhone, Gmail, and Schecon (third party service), creating quotation and invoice and viewing it on a pdf viewer, sending quotation or invoice to selected contacts. It also offers job searching.

MacheTalk (Forty Degrees Celsius Inc.)

A live viewing application that allows you to have a "two-handed" conversation like a video call ♪ Enjoy real-time communication! It is similar to Twitch where you can go live and interact with the viewers of your stream through chat. It also offers private messaging, audio call, and video call with other users you are connected with.

MacheTalk Live (Forty Degrees Celsius Inc.)

Live streaming app that makes friends with a little killing time! It is similar to Twitch but you are just a viewer of the stream or live broadcast and you can still interact with the broadcaster through chat. It also offers private messaging, audio call, and video call with other users you are connected with. It has in-app purchases to buy coins. A coin is used to view a live broadcast and send gifts.

NativeCamp. (Forty Degrees Celsius Inc.)

NativeCamp is an ESL online tutoring school in Japan. Lessons are provided via a unique language platform. NativeCamp is one of the rare online schools in the world that does not use Skype. Teachers usually use the browser (Chrome / Firefox) to do a lesson with a student. Students can use the browser or the application (iOS / Android).
